

Health & Safety Policy

AenZay standard operational procedure is to provide safe and hazard-free atmosphere to employees. Moreover, safe and healthy environment is not developed overnight. It is an outcome of continuous effort and determination to generate benchmarks & avoid procedural laps in order to provide safe environment for AenZay corporate community.

It's not solely responsibility of management to adhere compliance, it requires cooperation from each associated official of AenZay. Therefore, it's important to have open and clear communication across the board.

Policy Principles

Site workers whom are having safety issues or they have impression that further training is required in order to equipped them according to company's standards, they must inform their line supervisors without any delay.

It is important for each employee to adhere and apply safety protocols in workplace. Supervisors must develop a professional attitude and safety awareness in their workers thought process. Through proper counseling, motivational lectures, field related trainings, and regularly scheduled safety meetings. It is important for employees to comply the policies of health and safety standards.

AenZay safety standards are founded on an outcome of past experiences. These standards have structured organizational safety mechanism, AenZay ensured that employees apply health and safety parameters in workplace. Subsequently, special training sessions has been taking place in this regard.

Health and safety protocols are integral part of AenZay compliance, which promotes culture of human capital management and safety protocols.

The continuous usage of safety compliance makes working areas safer which provides health and risk free environment to work. We continuously strive to achieve high quality safety standards nationwide.
